Brenda is an international panelist who speaks, and presents workshops and seminars to professionals and aspiring entrepreneurs.

Running a construction company is what she does, but who she is The Vision Surrogate. Understand that a surrogate can extract data logic and systematically look up and replace every incoming idea from the natural visionary with a spiritual equivalent each time either a dimension record (information gathered from the natural visionary regarding the vision or idea) or a fact record (information about the natural visionary's abilities, strength and weaknesses) is brought into the spiritual manifestation environment. There are still more reasons to use surrogate visionaries. One of the most important is the need to decode uncertain knowledge.
